I'm Rahul and my core skills are User Experience Design, Interface Design and Front-end Engineering, My strengths: Zeal to build brilliant products, versatility and ability to get things done. I like to call myself a strategic thinker who connects with the end-user and gets hands-on with the codebase. When I'm not working, I click photos for **rimisen.in** or listen to classic rock and outrun or design logos and artwork.

During my short contract at **Fuzzie**, I helped the team build UX and front-end for their iOS, Android and web applications.

At **BigBinary**, my responsibilities were building the UX, UI and front-end for products such as **AgentInbox**, **NumberF**, **CareGeneral**, **UL MarksHub**, **AAPC Healthicity**, **Autobrain**, **DataScale** to name a few. My roles included building and leading the design team, working closely with the backend team, translating ideas and napkin sketches to a usable product, creating experience, design and front-end and to establish design thinking in the whole dev-team.

At **Bang the Table**, my key focus was on **EngagementHQ**, the flagship product widely used by the State Governments in Australia, New Zealand, Canada and the UK to engage with the public. My responsibilities consisted of building the user experience, interface and front-end, ensuring accessibility and standards compliance. Other projects I worked on are **BudgetAllocator**, **PeaceKeeperHQ** and **Zed**.

My role at **InsightMethods** was building the UX and UI for the cutting-edge application **Insightify**, a super easy survey tool and **Beehively**, a tool to connect teachers, parents and students online. My responsibilities were to build the User Experience from the sketches and ideas, build the detailed UI and Front-end.

SKILLS

EXPERIENCE

User Experience Design
Front-end Development

Fuzzie — UX and Front-end Designer

July 2016 - November 2016

- Created UX for Fuzzie Web, iOS and Android applications
