🌐 rahulmax.com

My core skills are User Experience Design, User Interface Design and Front-end Engineering, My strengths: Zeal to build brilliant products, versatility and ability to get things done. I like to call myself a strategic thinker who connects with the end-user and gets hands-on with the codebase.

At **Bang The Table**, my key focus is on **EngagementHQ**, the flagship product which is successful and widely used by the State Governments in Australia, New Zealand, Canada and the United Kingdom to engage with the public. My responsibilities consist of building the user experience, interface and front-end, translating ideas and napkin sketches to a usable product, ensuring accessibility and standards compliance. My roles include building and leading a front-end team to create the numerous tools in EngagementHQ and establishing design-thinking in the team. I also designed UX, UI and built the front end for tools such as **BudgetAllocator**, **PeaceKeeperHQ** and **Zed**.

My role at **InsightMethods** was building the UX and UI for the cutting-edge application **Insightify** — a super easy survey tool and **Beehively** — a tool to connect teachers, parents and students online. My responsibilities were to build the User Experience from the sketches and ideas, build the detailed UI and Front-end.

SKILLS

Interaction Design
User Experience Design
Project Management
Wireframing
User Interface Design
Front-end Development
Accessibility — WCAG2.0 AA
