🌐 rahulmax.com

My core skills are User Experience Design, Interface Design and Front-end Engineering, My strengths: Zeal to build brilliant products, versatility and ability to get things done. I like to call myself a strategic thinker who connects with the end-user and gets hands-on with the codebase.

My responsibilities at **BigBinary** include building the UX, UI and front-end for products such as **AgentInbox**, **NumberF**, **CareGeneral**, **UL MarksHub**, **AAPC Healthicity**, **Autobrain**, **DataScale** to name a few major projects. My roles include building and leading the design team, translating ideas and napkin sketches to a usable product, creating experience, design and front-end and to establish design thinking in the whole dev-team.

At **Bang the Table**, my key focus was on **EngagementHQ**, the flagship product widely used by the State Governments in Australia, New Zealand, Canada and the UK to engage with the public. My responsibilities consisted of building the user experience, interface and front-end, ensuring accessibility and standards compliance. Other projects I worked on are **BudgetAllocator**, **PeaceKeeperHQ** and **Zed**.

My role at **InsightMethods** was building the UX and UI for the cutting-edge application **Insightify** — a super easy survey tool and **Beehively** — a tool to connect teachers, parents and students online. My responsibilities were to build the User Experience from the sketches and ideas, build the detailed UI and Front-end.

SKILLS

User Experience Design
User Interface Design
Front-end Development
Project Management & Client Liaison
Competition & Data Analysis

User Experience Design
Project Management
Front-end Development
Accessibility — WCAG2.0 AA
W3C Standards Compliance

User Experience Design
User Interface Design
Usability Testing
Front-end Development
Accessibility — Section 508

EXPERIENCE

BigBinary — Design and Front-end Lead
August 2014 — Present

- UI and front-end for the agent communication platform, **AgentInbox**
- Created UX, Visual design and front-end for **NumberF**
- Overhauled the entire user experience and UI for the patient and elderly care management application **CareGeneral** which earned high-profile clients such as IBM and Innovista Health.
- Built UI and front end for UL.com's marks generator, **UL MarksHub**
- Lead the front-end team and created a custom front-end framework for the vast and complex compliance manager application, **AAPC Healthicity**
- Built UI and Front-end design for **AutoBrain**
- UX/UI/Front-end development for the data storage service, **DataScale**
- Built UX, visual design and front-end for **Rooster** Mobile application

Bang the Table — UX Engineer and Front-end/UI Lead
April 2010 — July 2014

- Built the entire **EngagementHQ**'s UX, UI and Front-end
- Built a front end theming framework for EngagementHQ
- Responsible for AA certification for EHQ from Vision Australia
- Designed 12 major EHQ rebrands for National Governments

InsightMethods — UX/UI/Front-end Designer
June 2008 — April 2010

- Built UX, UI and Front-end for **Insightify**
- Designed User Experience, Interface and Front-end for **Beehively**
- Responsible for accessibility AA certification for Beehively

EDUCATION

B. Tech in Computer Science Engineering from Government Engineering College, Thissur (2006)
